ENGINEERING SERVICES

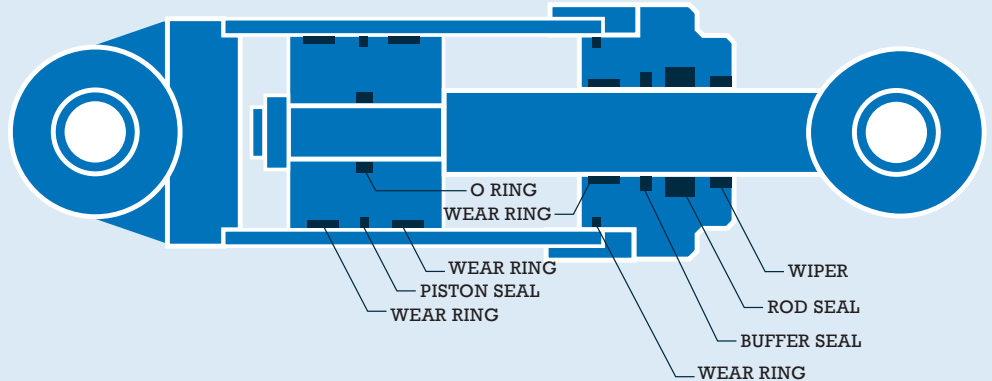

SEAL SELECTION

At Great Lakes Rubber, we're experts at assisting our customers in the proper material selection. We welcome you to talk to one of our on-staff engineers about your unique application.

APPLICATION DESIGN

Working on a new design? Let us assist in the development of your seal glands, ensuring you achieve optimal sealing for your application.

INSTALLATION GUIDANCE

The number one reason for seal leaks/failure is improper installation. Adherence to some basic tips from our seal experts can reduce your installation caused failures and reduce downtime.

FAILURE ANALYSIS

Uh-oh... you've got a leak. Whether it's our seal or someone else's, we can analyze your failed seal to determine root cause and redesign recommendations.
